EDUCATION

Indian Institute of Information Technology and Management (IIITM) Gwalior

Integrated BTech(IT)+MBA, 5-Year Dual Degree | CGPA: 7.5/10

Expected 2028

Madhya Pradesh, India

WORK EXPERIENCE

Software Developer Intern

Jul 2026 – Aug 2026

HiGigAi | [Next.js](#), [Sanity CMS](#), [Cloudinary](#), [Vercel](#)

Remote

- Shipped [tridentpublicschool.com](#) in a **1-month** engagement: **5 branch sites on 5 subdomains** from one Next.js codebase, cutting future branch onboarding to content entry only.
- Designed **25+ Sanity schemas**, scoping Studio via Structure Builder so **5 branch admins** manage **15+ page types** independently with zero developer involvement.
- Cut recurring infra cost to **\$0/month** by replacing a planned Supabase tier with Sanity-native forms and **Cloudinary** media, using **ISR** + webhooks for redeploy-free publishing.

Software Developer Intern

Jul 2025 – Sep 2025

Trionix Technologies | [Next.js](#), [PostgreSQL](#), [Firebase](#), [Row-Level Security](#)

Remote

- Architected the **VyaparPragati** admin platform across **6 backend modules** serving **500+ users**, adding real-time **Firestore** messaging in place of manual polling.
- Designed a normalized **PostgreSQL** schema with **Row-Level Security**; eliminated **N+1 queries**, halving **DB round-trips** on SSR routes.

PROJECTS

MCP Zero-Trust Security Gateway | [Python](#), [FastAPI](#), [Docker](#), [seccomp-bpf](#), [Landlock](#) | [PyPI: mcp-ztgateway](#)

- Built a **declare–verify–confine** gateway for **MCP** tool servers: **strace** verified capability grants compiled into per tool **seccomp-bpf** filters, denying anything undeclared.
- Added **provenance gating** and per-call **manifest re-attestation** (closing **CVE-2025-54136**); scored **84.6%** runtime defence, **100%** containment, **87.8%** on **MCPTox** across **583 rows**; shipped to **PyPI**.

CIDRA – CI Debugging & Repair Agent | [Python](#), [LangGraph](#), [Claude API](#), [Docker](#)

- Built a **LangGraph** + **Claude** agent that diagnoses **GitHub Actions** CI failures and verifies fixes in a sandboxed **Docker** loop, reaching **100%** Tier-1/2 diagnosis accuracy across **53+ tests**.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL

Web Development: Next.js, Node.js, FastAPI, REST API, Sanity CMS

AI/ML: RAG, LangChain, LangGraph, HuggingFace Transformers

Databases and Tools: PostgreSQL, Firebase, SQLite, Git, Docker, Linux, Figma

Cloud Exposure: Vercel, Cloudinary, AWS (fundamentals)

Relevant Coursework: OOP, OS, CN, DBMS, DSA

ACHIEVEMENTS

- Solved **1,000+ DSA problems** across **Code360** (2x Monthly Topper), **LeetCode** (Top 17%) and **GeeksforGeeks**; **Top 5%** in **Flipkart Gridlock Hackathon 2.0**; **Top 2%** in **JEE Mains 2023** (1.1M+ candidates).
- Built a **DPDP Act compliance demo** for a product case study; designed the **CampusSafe** SOS app UI/UX in Figma.
- Published an inference model on **HuggingFace Hub**; active **GSSoC** contributor; Runner-Up, **Blazing Wheels**, Infotsav.
- Merged a **pull request** into **kubeflow/trainer**, a CNCF-hosted open-source project.

POSITION OF RESPONSIBILITY

- Tech Lead**, **Hindi Samiti Club** & Robotics Team lead, Infotsav; **Internshala Student Partner** and member, **Student Gyan Movement**, IIITM Gwalior.
